EDUCATION

National University of Singapore (NUS) **Expected Jul, 2029**
Bachelor of Science in Business Analytics, Double Major in Economics
Special Programme in Undergraduate Research (SPUR)
GPA: 4.63/5.0 | Merit Scholar

WORK EXPERIENCE

Public Service Division, Prime Minister's Office **Sep 2026 - Present**
Analyst Intern (Strategic Planning)

- Developing an internal dashboard for senior leadership tracking around 20 key metrics on Public Service goals, designing the visuals and data presentation in Excel and Tableau.
- Automating the dashboard's data update process as the project moves through development.
- Building and testing an AI assistant on Pair, the government's in-house LLM, to streamline a recurring internal approval process and reduce paperwork for teams across PSD.
- Developing a live tool to facilitate planning discussions, combining Excel formulas for structured summaries with Copilot to synthesise qualitative input.

Private Tutor **Nov 2024 - Present**

- Deliver tuition and mentorship to several primary and secondary students, improving academic performance across all tutees.
- Develop lesson plans, customised exercises, and progress tracking reports.
- Impart efficient study methods for students to build independent study habits.

Singapore Armed Forces **Jan 2023 - Nov 2024**
Commando Specialist

- Graduated from Commando Small-unit Leadership Course (Top 50 of 250), demonstrating teamwork and leadership.
- Maintained morale and training standards of a detachment of 16 soldiers, contributing to ‘Best Combat Unit’ award.
- Selected for Ground Forward Air Controller course (3 of 60), requiring rapid problem-solving and clear communication under pressure.

PROJECTS

Routlette **NUS Orbital 2026**

- Co-built a mobile app with a React Native frontend, FastAPI backend, Supabase Database, using the Google Maps API to generate randomised walking routes and lead users to hidden gems.
- Integrated a Llama model end to end (prompt design, prompt engineering, output parsing) to auto-generate clue hints between stops.
- Wrote a pytest and Jest test suite (137 tests) covering authentication, filtering, scoring, and API logic across the backend and frontend.

Kart Telemetry Dashboard

- Built a Python pipeline automatically cleaning, aligning, and segmenting raw sensor data files into lap-level metrics, removing the need for manual review of raw exports.
- Delivered a self-contained, no-install dashboard surfacing performance insights invisible in raw data.
- Automated the pipeline with a Power Automate Desktop flow that watches the export folder, triggers the cleaning script on each new file, and archives processed exports.

Agentic Development Pipeline

- Directed a Claude coding agent through a structured pipeline (ideation, prototyping, ticket breakdown, implementation, human-reviewed QA), shipping 8 sub-issues with 76 passing tests while retaining ownership of architecture decisions and final QA.

Beijing Property Market Analysis **2026**

- Applied Random Forest and statistical modelling to real estate data, analysing liquidity, intrinsic asset value, and policy shocks across districts and housing types.
- Interpreted model outputs into hedonic pricing findings and investment insights, presenting analytical results via Tableau to a judging panel.

Financial Run Dynamics (Databusters) **2026**

- Researched and modelled financial run dynamics through a full data pipeline (cleaning, EDA, visualisation) using Python and R, then presented findings and policy suggestions to a judging panel.

Data Cleaning Pipeline

- Built a four-stage Streamlit app (ingest, clean, EDA, export) that lets users upload a CSV or Excel file, apply cleaning transformations with a live audit trail, and export the cleaned dataset or a pre-populated report.

Daily Briefing

- Built an automated dashboard using GitHub Actions as a scheduler pulling news, and task data from multiple APIs, using Groq that runs on Llama to summarise key happenings into a single page generated fresh each morning.

CO-CURRICULAR EXPERIENCE

Pixel Labs (Digital Design & Media Club) **Nov 2021 - Nov 2022**

Vice-president

- Led video production and promotional content creation for major school events, including the 2023 Open House campaign.
- Trained 30+ members in video creation and post-processing using Adobe Premiere Pro.

AC Uniformed Groups (ACUG) **Nov 2021 - Nov 2022**

Vice-president

- Collaborated with the EXCO to plan and run CCA sessions that shared leadership practices across Uniformed Group units school-wide.
- Led the J1 cohort in an ACUG x ALittleChange community service collaboration, packing and distributing over 800 care packages to low-income households on Total Defence Day.

CCA Advisory Board (CCAAB) **Nov 2021 - Nov 2022**

EXCO Member

- Represented Service CCAs on the board, raising issues and feedback between CCA leaders school-wide.
- Initiated the CCAAB Dialogue Session connecting incoming J1 leaders with seniors, and an encouragement board recognising student-athletes at the National School Games.

Economics Society **Nov 2021 - Nov 2022**

- Researched the economic effects of the Ukraine-Russia conflict on Singapore for an intra-school infographic competition during Economics Week.

SKILLS & INTERESTS

- **Technical:** Python, SQL, R, Data Analysis & Visualisation (Excel, Tableau), Data Organisation and Cleaning (R, Python, Excel)
- **AI & Automation:** Applied machine learning (Random Forest, statistical modelling); LLM (Llama) integration for automated text generation and parsing; RPA (Power Automate Desktop); agentic automation workflows with human-led verification
- **Skills:** Team Leadership & Mentoring; Project & Event Coordination; Communication & Stakeholder Engagement
- **Interests:** Cycling, Running, Gardening
